DIAMOND PADS

Diamond Impregnated Pads

New and improved, versatile diamond pads that every contractor needs on every job!

Designed specifically for use under high speed burnishers and floor scrubbers. The new SASE Trifecta Diamond Pads are perfect for burnishing sealers on polished concrete to removing imperfections or even a full rejuvenation, the SASE Trifecta Diamond Pads do it all.

With an all new and improved pad material that provides longer life and improved efficiency, the SASE Trifecta Diamond Pads are something every contractor needs on every job!

FEATURES

- New and improved formula includes an exclusive, proprietary diamond matrix
- Higher denier woven pad material creates a more durable pad compared to previous versions
- Restores shine or full rejuvenation on certain polished concrete floors
- Removes imperfections left by the polishing process with less swirl lines left on the floor compared to other diamond impregnated burnishing pads
- Perfect for removing resin swirls left from higher grit diamond tooling
- Ideal for burnishing after applying polished concrete sealers like SASE Protect Select or SPR-3
- Easily blend edge grinding into main polished floor
- Use with an auto-scrubber for periodic restoration of worn areas on polished concrete and other hard surface flooring
- Available in various sizes and grits
